

We are studying lung cancer in Asian females who have never smoked.

Help us find out why this is happening:

57% of Asian American females diagnosed with lung cancer have never smoked.

While 16% of all females diagnosed with lung cancer have never smoked.

Who can join?

Asian females living in the greater Bay Area (including mixed Asian/other), aged 21–90, **who have never smoked**

We are looking for two groups:

- Females **recently diagnosed** (within the past 9 months) with lung cancer
- Females **never diagnosed** with any type of cancer

What is involved?

- **Completing 45-minute survey** online, by phone, or by mail (\$25 gift card)
- **Providing a saliva sample** (\$25 gift card)
- **Permission to access lung tissue** that was removed during surgery or biopsy (\$25 gift card, for lung cancer patients only)

Joining is voluntary, and your information will be kept confidential.
